

Your name, title, and address:
Name of Cohort:
Type of Cohort: (commercial sex workers, IV drug users, discordant couples, men who have sex with men, mother to child transmission, blood product exposed subjects, etc)?
Size of cohort?
Are these individuals high or low risk, why?
Estimated number of "Exposed, Uninfected" Subjects
Geographic location?
Time/Duration of follow up (median-range)?
Type and numbers of samples collected: DNA for genetics, blood for immunology studies, genital tract sampling, other?
Type of Epidemiologic data collected: Basic demographics, risk of exposure to HIV, sexual history and health, etc?
Type of studies done on samples: What tests/analysis was done on these samples?

Future plans with samples: Any plans in place to prospectively study these samples?
Are you interested in making your samples available to fellow partners in a research consortium (with the appropriate assurances of recognition, partnership and data ownership)? If no, why not?
Would you consider making your raw unpublished data available to fellow partners in a research consortium (with the appropriate assurances of recognition, partnership and data ownership)? If no, why not?
Do you have any colleagues who study similar subjects, and would you be comfortable forwarding their names to be similarly contacted?
