

## ***Welcome from ICID***

Welcome to Winnipeg and the International Symposium on Natural Immunity to HIV.

In partnership with the Bill and Melinda Gates Foundation, Public Health Agency of Canada, Province of Manitoba, and University of Manitoba, the International Centre for Infectious Diseases (ICID) is pleased to be hosting this international event that brings together top researchers from around the world.

We hope that through the sharing of current knowledge and hypotheses on HIV immunity, researchers will determine how to further scientific advancements and solutions. We believe that developing a long-term strategy for supporting and sustaining collaborations is paramount to accelerating the discovery that will end this global HIV crisis.

We look forward to an interesting symposium.

A handwritten signature in blue ink that reads "H Medwick".
